

Follow the steps in this guide before you install the tracker

1 LOCATE THE IMEI NUMBER

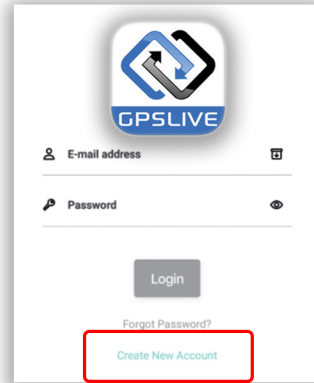

The IMEI number will be printed on the box.

If you are an existing user, log in to your GPSlive account and continue to step number 5.

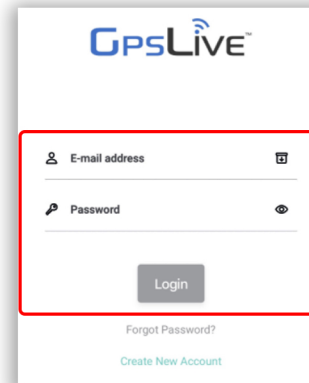

If you have purchased a device with subscription (service top-up) continue to step number 8.

2 REGISTER YOUR ACCOUNT

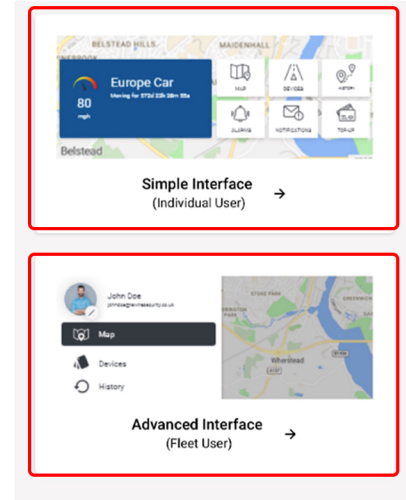

Download the GPSLIVE app from the Apple App Store or Google Play store. Open the app and tap on "Create New Account". Enter your email address and tap on "Register".

3 ACCESS YOUR ACCOUNT

Check your email inbox/spam for an email from GPSLIVE which will contain your username and password. Open the GPSLIVE app and log in using the username and password provided in the email.

4 SELECT YOUR INTERFACE

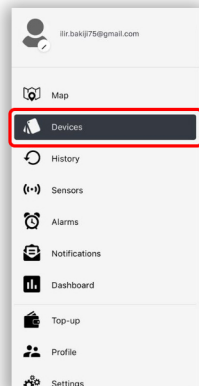

This can be changed in settings at any time.

5 ADD YOUR DEVICE

Advanced Interface

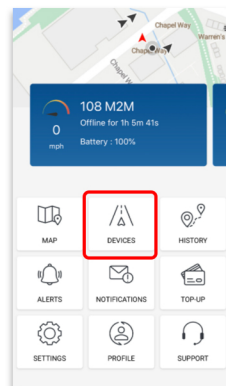

Tap on menu button in the top left corner

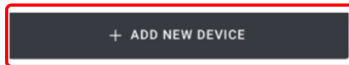

Tap on Devices

Simple Interface

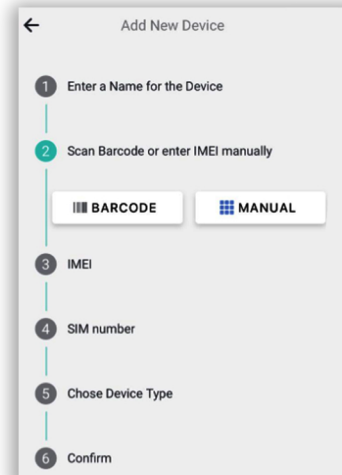

Tap on Devices

Tap on ADD NEW DEVICE

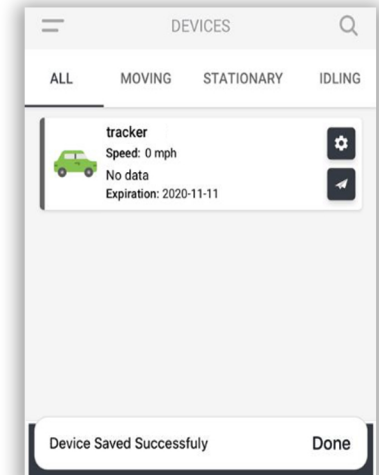

6 FILL THE FORM PROVIDED

Fill the form provided and tap on Save

7 SAVE YOUR DEVICE

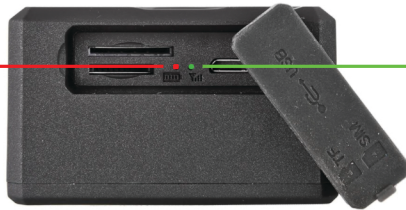

Your Device has been added and activated

Charging & Status LEDs

8 BATTERY LED (RED)

Flashing - Needs Charging
Light On - Charging
Light Off - Fully Charged

STATUS LED (GREEN)

Light On - No Signal
Flashing - Operational

The tracker should be charged before each use and periods of storage. Only use the original USB cable provided with the tracker to charge. A charging plug rated at 5V/2A is recommended to charge the tracker.

Charging can take up to 9 hours but must not exceed 15 hours. Never leave the device unattended while charging.

9 Switching on the device

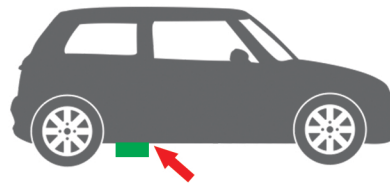

The tracker is supplied switched off and switches on automatically once the SIM card has been fully installed.

To switch the tracker on, push the sim card until you feel a click. Once installed the green status LED next to the sim card slot will switch on and start to flash.

10 Fitting the device

The easiest way to fit the 104 is to attach it to the metal surface underneath the vehicle that you wish to track. The tracker features a magnetic base for easy mounting. While installing always make sure the surface you are attaching to is clean, flat and away from any sources of heat. Care should be taken to make sure the tracker is not positioned in an area where the tracker could be knocked off or damaged by moving parts.

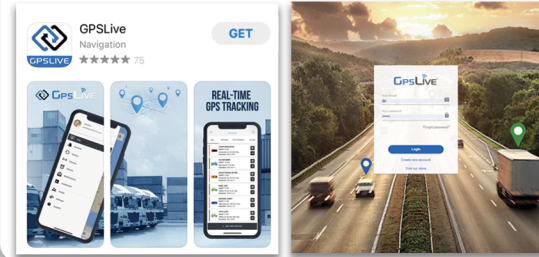

The waterproof pouch provided with the tracker should always be used. The pouch should be checked before each use to ensure it is closed tightly and is not damaged in anyway. If damaged the pouch should be replaced immediately to avoid invalidating the trackers warranty.

If you have just activated the tracker it can take up to 10 minutes to establish an initial GPS fix. A short journey will allow the tracker to establish a GPS satellite fix quicker.

11 Accessing your account

To access your account please visit: WWW.GPSLIVE.CO.UK or get our free to download app on Google Play or Apple App Store

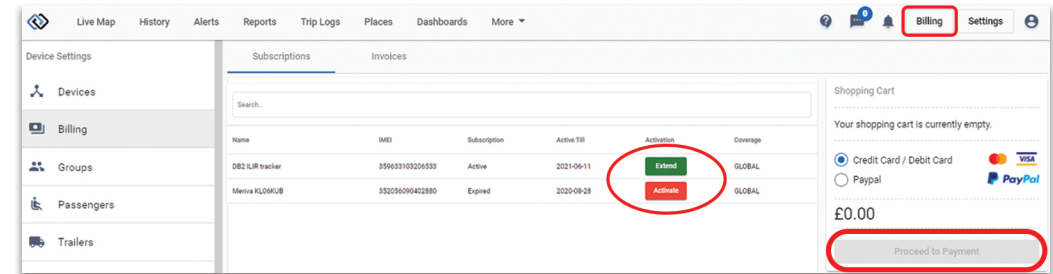

Please use the details below to log in to your account. You can change your password once you have logged in to your account.
